Dear Sirs,

CARNARVON WEEKLY DRILLING REPORT

POE-1 Development Well - Thailand

The POE-1 well is located in the northern part of the Wichian Buri Oil Field (Figure 1) 700 metres north and updip of the POE-2 well which was the first well drilled in this Phase 1 drilling programme.

The POE-1 well is being drilled to a total depth of 1,251 metres. Primary objective is the "F" sandstone which is the current producing reservoir at Wichian Buri. However the well will be drilled deep enough to ensure that other potential reservoirs including the "G" sandstone are also intersected.

Location

The well is located at latitude 15° 37' 55.2N" and longitude 101° 08' 59.63E" within the Petchabun Basin onshore Thailand.

Progress

As at 6.00 am this morning the well had reached a depth of 548 metres. The 7 inch casing has been run in the hole, cementing of the casing has been completed and the well is being readied to drill ahead to TD as planned. The hole is in good condition and the drilling is proceeding as planned.
